Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 4-13 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependant claim. See MPEP § 608.01(n). Accordingly, the claims 4-13 not been further treated on the merits.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by EP 0 957 261

A2. The document discloses a fuel pump for supplying fuel to a fuel injector of an internal combustion engine, the fuel pump 10 including: a pumping plunger 28 that is reciprocable within a plunger bore 26 provided in a pump housing 24 under the influence of a cam drive arrangement to cause fuel pressurization within a pump chamber 26, wherein the drive arrangement includes a cam driven drive member coupled to plunger the to impart drive thereto, in use, so that the plunger performs a pumping cycle including a pumping stroke and a return stroke, an inlet metering valve

Art Unit: 3747

36 operable to permit control of the quantity of fuel supplied to the pump chamber (26) during the return stroke of the plunger (28), and an outlet valve (62) for controlling the supply of pressurized fuel from the pump chamber, through an outlet passage (48) to the fuel injectors of the engine in circumstances in which the inlet metering valve (36) is closed, wherein the outlet passage (48) communicates with a pump outlet, which is substantially co-axially aligned with the inlet metering valve 36 and the plunger 28. See Figure 2. The pump is disclosed as a pump for supplying pressurized fuel to a fuel injector. However, the claimed intended use of the pump for supplying fuel to a common rail is merely intended use of the known fuel pump since the structure of the pump meets the claim. Regarding claim 2, the inlet metering valve includes an elongate inlet valve member that is co-axially aligned with the plunger.

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See the various fuel pumps having similar coaxial arrangement.
